The Colony, Texas | 972-469-2975 | daylynvic@gmail.com | <https://www.linkedin.com/in/dv127/> | [Github](#)

TECHNICAL SKILLS

- **Languages & Technologies:** CSS/HTML, JavaScript, Typescript, Python, SQL
- **Tools & Platforms:** Git/GitHub, Maven, Spring Boot, React, Docker, Bruno, Visio, ServiceNow

PROJECTS

Smart Campus Navigation Application

Java (Spring Boot/Maven), React, GitHub

- Developed a UNT campus navigation interface using React, JavaScript, HTML, and CSS, integrating the Google Maps API to power user location tracking, user preferences, and real-time map updates
- Conducted unit testing in JUnit and managed collaboration pipelines in GitHub via feature branching, PR reviews, and merging strategies
- Designed validation test suites, defined functional requirements, and executed UAT testing for the Smart Campus Navigation System to ensure end-to-end software reliability

Real-Time Algorithmic Performance Analysis

C++, Linux (UNT CELL Servers)

- Programmed Insertion, Selection, Merge, and Heapsort algorithms in C++ across datasets up to 1,000,000 elements in a remote Linux environment.
- Analyzed empirical data across six dataset sizes to validate theoretical time complexity, documenting performance degradation in $O(n^2)$ algorithms versus consistent $O(n \log n)$ algorithms at scale

EXPERIENCE

JP Morgan Chase & Co.

Product Delivery Associate, Product & Experience Technology

Plano, TX

Sep 2025 – Present

- Developed a Python script to interface with the qTest REST API, parsing JSON responses and transforming extracted test data into structured Excel reports
- Deployed custom JavaScript automation scripts to batch-process metadata for 750+ documents, eliminating legacy operational latency.
- Analyzed and troubleshoot regulatory payload failures for the Controls Change Manager system by querying and investigating raw database transactions using DBeaver, accelerating defect triage and resolution between the ELA application and compliance databases

Control Manager, Global Banking

Jun 2024 - Sep 2025

- Optimized database logic using complex SQL queries to enforce data-classification rules, boosting accuracy by 63%
- Designed role-based access control (RBAC) schemas and permission logic to secure 25,000+ enterprise endpoints.
- Designed and built a custom front-end dashboard hub using HTML and CSS within Confluence, featuring structured report cards, direct navigation links, and dynamic update frequency tags for the NGP system

Product Associate, Commercial Banking

Sep 2022 – Jun 2024

- Facilitated requirement gathering sessions with Home Lending and CIT stakeholders to translate complex business needs into functional Jira story requirements
- Translated GSE and federal regulatory updates into business rules for internal tooling, maintaining audit readiness for OCC examinations

EDUCATION

Oregon State University

Master of Science, Computer Science GPA 4.0

Corvallis, Oregon

Expected: 2028

- Coursework in Software Engineering, Analysis of Computer Algorithms (C++), Fundamentals of Artificial Intelligence

University of North Texas

Bachelor of Business Administration, Risk Management

Denton, Texas

May 2021

- Coursework in Object Oriented Programming in Java, Data Warehousing, and Analysis of Information Systems
